ABOUT EQUISSAGE - Horse Physiotherapy and Massage

Equissage has been developed from Niagara Therapy physiotherapy products that have been used on humans for both injuries and mobility for over 50 years. This equipment is used in hospitals, clinics and sports clubs. It's also built into furniture for home use.

Through ongoing research conducted in Hospitals, Universities, and research institutions this form of treatment has been proven to be totally non-aggressive and free of side effects.

The medical benefits include increased circulation and lymphatic drainage, relaxation of muscles and increased joint mobility, which in turn produces better movement and performance for you and your horse.

The Equissage Back Pack gives a deep cycloidal massage to the whole horse. Due to the unique action of the therapy, the Back Pack actively improves circulation, eases and tones muscles, and promotes lymphatic drainage. This manual will show how to help with a number of specific conditions. Whilst in itself is not a cure, the use of the Hand Pack in conjunction with the Equissage Back Pack can significantly speed up healing of these conditions.

The Hand Pack should always be used in conjunction with the Equissage, as the action of the Hand Pack will be far more effective when the horse's lymphatic system is already stimulated by the Back Pack.

Equissage Physiotherapy can help your horse by improving:

- Local blood circulation
- Venous drainage
- Lymphatic drainage and reduce swelling
- Joint mobility
- Respiratory conditions
- The release of tension

Equissage is the most versatile, safest, surest and easiest way to help your horses recover their peak form and speed up the healing of the most common ailments.

What some well known horse trainers and riders have to say about Equissage.....

"Equissage is an essential training tool that I use in all my racing stables. We use Equissage for rehabilitation purposes and for preventative maintenance. I am impressed with the results of using Equissage Therapy. I would highly recommend the use of Equissage to any any trainer."

— Graeme Rogerson, *International Racehorse Trainer, Hamilton NZ*

"An excellent piece of equipment which undoubtedly improves the horses" -William Fox Pitt

"I have had numerous successes reducing swelling on knees, fetlocks and tendons"- Julie McEwan - Southland, New Zealand

"Padfoot Charlie had a severe tendon issue and it was thought he would never race again" Bruce Cross - Trainer, Archer Lodge

"Every competition horse should have one" -Paula Tornquist

"The Equissage enhances my horses' performance" -Di Lampard
