

Product/Service Information

Safe T Halter (patent pending). Winner Young Inventor of the Year 2009 at National Fieldays

At last a halter that you can safely leave on your horse! The Safe T Halter is specially designed to self release, dropping cleanly off the horses head should the halter become caught on anything. Widely field tested, including on young foals. It's fantastic for horses/ponies needing to wear sun guards, over-nighting in yards at shows, hard to catch horses or any other situation where a halter needs to be left on. Safe T Halters are available direct from their inventor Sacha Rennie. Price: \$30 + pp for standard sizes (foal, pony, cob & hack). Special sizes please contact for a quote.
